

# PUBLIC INFORMATIONAL MEETING

Madison Street, City of Evansville  
(Walker Street – USH 14)  
STH 59/213  
Rock County

6:00 TO 8:00 P.M.  
Tuesday, September 25, 2007

Evansville Public Works Building  
535 S. Madison Street  
Evansville, WI

The Wisconsin Department of Transportation welcomes you to this Public Informational Meeting for the proposed Madison Street pavement rehabilitation project. The purpose of today's meeting is to give you an opportunity to view, discuss, and comment on the proposed project.

## AGENDA

- 6:00 P.M. Formal Presentation
- 6:15 P.M. Questions and Discussion

Please feel free to ask questions and offer suggestions during the open house. A self-addressed, postage-paid comment sheet is attached for your written comments. You may leave it with us at the meeting or fold and mail it to our office.

## **Project Location**

This project is located on STH 59 (Madison Street), in the City of Evansville, Rock County, Wisconsin. The project is 0.878 miles long, extends from the South City Limits to the intersection with USH 14.

## **Need For Project**

The existing asphaltic pavements are deteriorated and need to be rehabilitated to extend the life of the pavement. Many of the joints in the concrete pavement are in poor condition, and have been repaired in the past.

## **Proposed Improvements**

It is proposed to replace the existing concrete pavement with new asphaltic pavement, and replace the existing curb and gutter. It is also proposed to rehabilitate the existing asphaltic pavements by milling off a portion of the surface and repaving it with new asphalt. Particularly, from Garrison Dr. to Church St., 2.25" of asphalt will be milled out and replaced with new HMA (Hot Mix Asphalt) Pavement. From Church St. to Mill St., the road will be reconstructed with new sub-base, base and 5.25" of HMA Pavement. From Mill St. to the railroad tracks, the existing concrete will be removed and replaced with additional base and 5.25" of new HMA Pavement. Improvements to the intersections with Water Street and Old Highway 92 will also be constructed.

## **Right-Of-Way**

Right-of-way acquisition is required to make the intersection improvements and to add sidewalk from Garrison Dr. to Walker St. on the East side of STH 59 (Madison St.)

## **Access During Construction**

USH 59 (Madison St.) will be closed to thru traffic between Garrison Dr. and USH 14. Local access will be provided at most times, with staging done at the intersection of Main St. and Madison St.

## **Detour**

Traffic will be detoured using USH 14 and CTH M.

## **Construction Schedule and Funding**

This project will be constructed in 2008.

The total construction cost is projected to be approximately \$1,000,000. The majority of the construction will be paid for using Federal and State funds. Municipal funds will be used to pay for work involving city utilities, sidewalk replacement, and parking lanes.

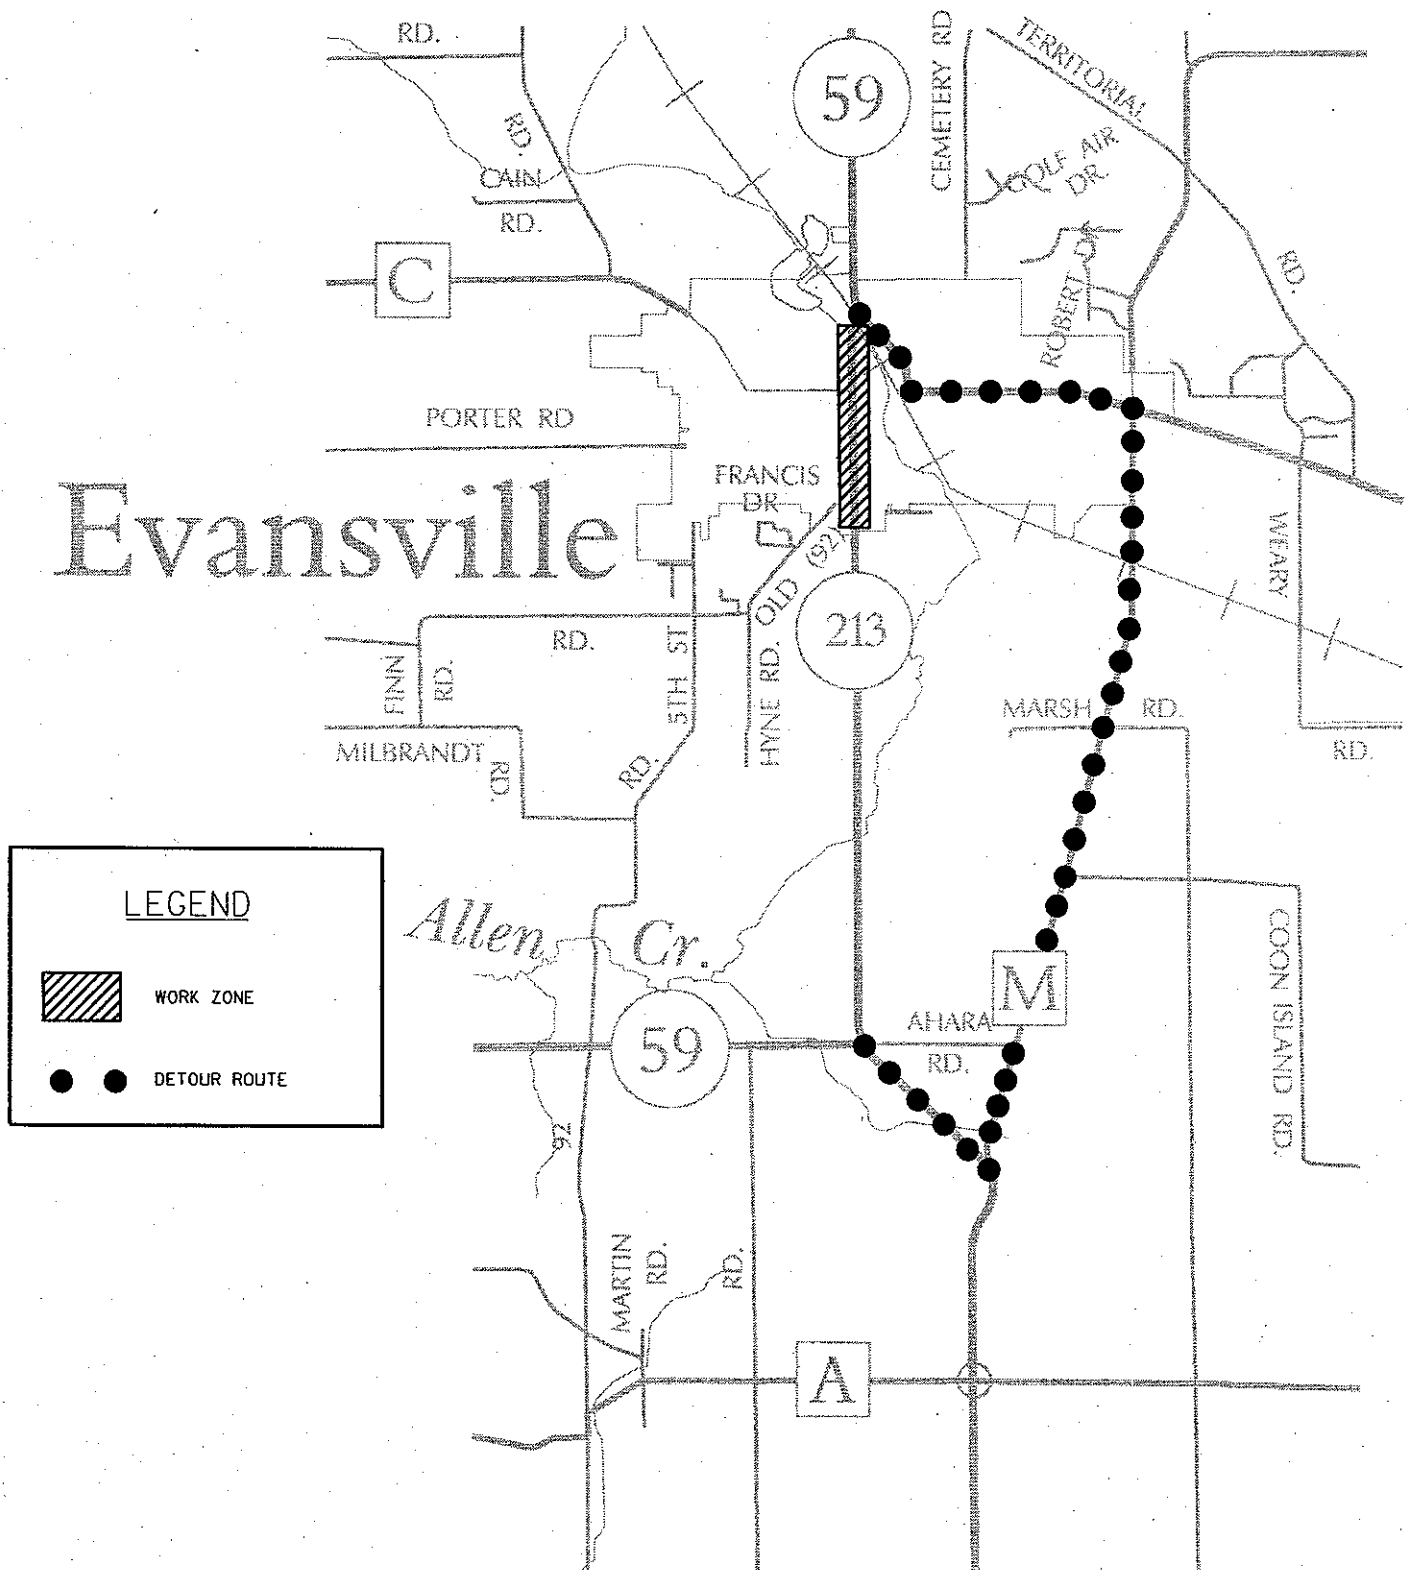

## **Final Design**

The final design will be complete in November of 2007.

## **Comments**

Please use the attached sheet to comment on any concerns you may have regarding the proposed project. You may leave it with us today or mail it to our office.
